Water Analyses

Dear Brian:

Attached find results of the analysis of the water samples taken from the WTC site on June 10, 2002. MTBE level for the sump discharge (B-6 30 hp sump pump) was 35 ppb and for the Greenwich Street wells was 0.3 ppb. Chlorodifluoromethane was 140 ppb in the sump discharge and 1.0 ppb in the Greenwich St. well discharge.

Also enclosed are the results of testing for dioxin and asbestos water samples taken on June 10th. Sample ID # 355438 is taken from the Greenwich Street dewatering well discharge and Sample ID # 355439 is taken from sump discharge.

We are also forwarding a copy of the tables which track MTBE and Chlorodifluoromethane concentrations for all of the water sample testing which has been performed on the site.

Very truly yours,
MORETRENCH AMERICAN CORPORATION
