Water Analyses

Dear Brian:

Attached find complete results of the analysis of the water samples taken from the WTC site on March 4, 2002. MTBE levels for the sump discharge (B-6 30 hp sump pump) and dewatering wells (Main Discharge) are 31 ppb and 2.8 ppb respectively.

We are also forwarding a copy of the table which tracks MTBE concentration for all of the water sample testing which has been performed on the site.

Very truly yours,
MORETRENCH AMERICAN CORPORATION
