Re Water samples analysis report
H.S for Leadership & Public Services (M894)
90 Trinity Place
New York, NY 10006
ATC Project No 41617-0561

Dear Mr. Orlan:

At the request of New York City Board of Education (BOE), ATC Associates, Inc. (ATC) collected samples from drinking water fountains indicated to ATC by the school's custodian at H S. for Leadership & Public Services (M894), located at 90 Trinity Place, New York, NY. The water samples were collected to determine if detectable levels of total coliform bacteria are present in the potable water of H S for Ledership & Public Services (M894)

On January 10, 2002, ATC's representatives Mr Yiannis Efstathiou and Ms. Mariana Medinets visited the H.S. for Leadership & Public Services (M894) and collected samples from twenty-one (21) drinking water fountains throughout the school building indicated to him by the school's custodian All water samples collected were submitted to New York Environmental & Analytical Laboratories, Inc. for analysis Each sample was analyzed for total coliform bacteria All analytical results indicated that this bacteria was "absent". See attached laboratory results for more details.

Based on these results, ATC conludes that there is no evidence of total coliform in the drinking water supply at H.S. for Leadership & Public Services (M894) and no further investigation is recommended or required
