Water Analyses

Dear Brian:

Attached find complete results of the analysis of the water samples taken from the WTC site on March 25, 2002. MTBE levels for the sump discharge (B-6 30 hp sump pump) and dewatering wells (Main Discharge) are 24 ppb and 3.1 ppb respectively.

Chlorodifluoromethane is 220 ppb in the sump discharge and 13 ppb in the dewatering well discharge.

We are also forwarding a copy of the tables which track MTBE and Chlorodifluoromethane concentrations for all of the water sample testing which has been performed on the site.

Very truly yours,
MORETRENCH AMERICAN CORPORATION
