FW: Pilot Program Bulk Sample Results Report

Penny -

Here are the initial bulk sample results for each of the tent locations. The caulk all appears to have been ACM.

Chris
Per your voicemail, attached find the results for the twelve (12) asbestos bulk samples - sample numbers 013 to 024 - of aluminum column cover caulking collected at the Pilot project locations. Three bulk samples at each of the four locations were collected on 06/17/05 by Nazar Agahan of TRC, a NYSDOL certified Inspector and analyzed by EMSL. Should you have any questions or require any additional information, please do not hesitate to contact us

Thanks
Ed
