ISSUED TO:

Martin Sadofsky
119 Chambers Street
New York, NY 10007

Pursuant to Section 25-310 of the Administrative Code of the City of New York, the Landmarks Preservation Commission hereby approves certain alterations to the subject premises as proposed in your application completed on June 21, 2002.

The approved work consists of cleaning the facade of the building of debris related to the collapse of the World Trade Center, including removing all loose debris using, on the horizontal surfaces, non-metallic bristle brushes or scrapers, followed up by wet wiping and, at the horizontal and vertical surfaces, a low pressure water rinse of not more than 250 PSI, as described in specifications prepared the City of New York Department of Environmental Protection and submitted as components of this application

In reviewing this proposal, the Commission noted that the Tribeca South Historic District Designation Report describes 119 Chambers Street as an Italianate style store and loft building constructed in 1858. The Commission also notes that there is some debris on the facade.

Staff has reviewed these specifications and finds that the work on the facade will not require the removal of any significant protected architectural material; and that it will not detract from the architectural character of the building or streetscape. Therefore, the Commission has no objection to the work proceeding at this time, or the issuance of permits by any other city agency.

A copy of this permit have been sent to the Department of Environmental Protection.

This permit is issued on the basis of the building and site conditions described in the application and disclosed

during the review process. By accepting this permit, the applicant agrees to notify the Commission if the actual building or site conditions vary or if original or historic building fabric is discovered. The Commission reserves the right to amend or revoke this permit, upon written notice to the applicant, in the event that the actual building or site conditions are materially different from those described in the application or disclosed during the review process.

All approved drawings are marked approved by the Commission with a perforated seal indicating the date of approval. The work is limited to what is contained in the perforated documents. Other work or amendments to this filing must be reviewed and approved separately. The applicant is hereby put on notice that performing or maintaining any work not explicitly authorized by this permit may make the applicant liable for criminal and/or civil penalties, including imprisonment and fines. This letter constitutes the permit; a copy must be prominently displayed at the site while work is in progress. Please direct inquiries to John Graham.

105 Reade Street
New York, NY 10013

Pursuant to Section 25-310 of the Administrative Code of the City of New York, the Landmarks Preservation Commission hereby approves certain alterations to the subject premises as proposed in your application completed on June 21, 2002.

The approved work consists of cleaning the exterior of the building, including the facade and roof, of debris related to the collapse of the World Trade Center, including, at the facade, removing all loose debris using, on the horizontal surfaces, non-metallic bristle brushes or scrapers, followed up by wet wiping and a low pressure water rinse of not more than 250 PSI, and, at the roof, collecting all loose debris, washing loose gravel, and wet wiping other surfaces, as described in specifications prepared the City of New York Department of Environmental Protection and submitted as components of this application

In reviewing this proposal, the Commission noted that the Tribeca South Historic District Designation Report describes 105 Reade Street as an Italianate style store and loft building constructed in 1860-61. The Commission also notes that there is some debris on the roof and facade

Staff has reviewed these specifications and finds that the work on the roof will not require the removal of any significant protected architectural material; and that it will not detract from the architectural character of the building or streetscape. Therefore, the Commission has no objection to the work proceeding at this time, or the issuance of permits by any other city agency.

A copy of this permit have been sent to the Department of Environmental Protection.

This permit is issued on the basis of the building and site conditions described in the application and disclosed during the review process. By accepting this permit, the applicant agrees to notify the Commission if the actual building or site conditions vary or if original or historic building fabric is discovered. The Commission reserves the right to amend or revoke this permit, upon written notice to the applicant, in the event that the actual building or site conditions are materially different from those described in the application or disclosed during the review process.

All approved drawings are marked approved by the Commission with a perforated seal indicating the date of approval. The work is limited to what is contained in the perforated documents. Other work or amendments to this filing must be reviewed and approved separately. The applicant is hereby put on notice that performing or maintaining any work not explicitly authorized by this permit may make the applicant liable for criminal and/or civil penalties, including imprisonment and fines. Re: LPC - 027013
NOR 02-7303
67 GREENWICH STREET
67 Greenwich Street Building
NOT DESIGNATED
Borough of Manhattan
Block/Lot: 19 / 11

The staff of the Landmarks Preservation Commission recently received a request to review a proposal for work at the subject premises. The proposed work consists of cleaning the exterior of the building, including the facade and roof, of debris related to the collapse of the World Trade Center, including, at the facade, removing all loose debris using, on the horizontal surfaces, non-metallic bristle brushes or scrapers, followed up by wet wiping and a low pressure water rinse of not more than 250 PSI, and, at the roof, collecting all loose debris, washing loose gravel, and wet wiping other surfaces, as described in specifications prepared the City of New York Department of Environmental Protection and submitted as components of this application.

Staff has reviewed these specifications and finds that the work on the facade and roof will not require the removal of any significant protected material; that it will not detract from the architectural character of the building or the streetscape, and that cleaning the facade will bring the building closer to its historic appearance. Therefore, the Commission has no objection to the work proceeding at this time, or the issuance of permits by any other city agency.

A copy of this permit have been sent to the City of New York Department of Environmental Protection.

A handwritten signature in black ink, appearing to read "John Graham".
