Subject: DEP exterior work

PII of 12 John Street called on 10/7 to complain that exterior power washing was being done by NYCDEP on the building next door to hers. According to **PII** no notification was given to her building that this work would be occurring. Therefore, she was concerned that her recently purchased A/C may have become recontaminated from the water and dust being blown off the neighboring building. She would have removed the A/C from the window or at the least covered it if she knew the work was going to occur. She also complained that when she approached the workers they ran away from her.
