Dear Sir/Madam:

The New York City Department of Environmental Protection (DEP) in cooperation with the United States Environmental Protection Agency (USEPA) and the New York State Department of Labor (NYSDOL) has performed a series of exterior building surveys on various buildings in the vicinity of the World Trade Center (WTC). The surveys included the examination of building exteriors including building roofs, facades, setbacks, and other exterior surfaces. These surveys identified locations where debris from the collapse of the WTC was still visible. Our records indicate that visible debris accumulations were observed at the above referenced building (the "Building").

In our previous correspondence, the Department requested an assessment and appropriate clean up of visible debris accumulations. The Department has either not received information regarding your actions to address the debris accumulations or has re-inspected your building and found that visible debris was present.

The USEPA and DEP are continuing their ongoing efforts to improve air quality in lower Manhattan. In this regard, DEP is initiating a program (the "Cleaning Program") to clean the exteriors of certain buildings in the downtown Manhattan area.

Based on visual surveys and analyses of other properties in the area, we are assuming that the debris accumulations noted on the exterior of the Building may include some amount of asbestos-containing material (ACM). DEP would like to include the Building in the Cleaning Program, and clean the facades, roofs, and other exterior surfaces so as to remove such accumulations. The work would be performed by NYSDOL licensed asbestos contractors with DEP and NYSDOL certified workers. The fees and expenses of the asbestos contractor in performing the work will be paid for by the DEP.

The work will be monitored by DEP personnel. An independent third-party air monitoring firm will also be engaged to take air samples at designated points around the perimeter of the working area. The U.S. Occupational Safety and Health Administration (OSHA) will provide oversight for worker safety. The fees and expenses of DEP personnel in monitoring the work and the fees and expenses of the third-party air monitoring firm in taking and analyzing air samples will be paid for by DEP.

(718) DEP-HELP

In order to proceed with this cleaning, we will need your cooperation and assistance in (a) arranging a schedule to have the work performed, (b) designating a contact person at the Building to address any issues that may arise during the course of the work, and (c) securing legal consent from the owner of the Building so that DEP and contractor personnel have appropriate access to the property.

A License Agreement is attached to this letter. The License Agreement is intended to document permission from the Building owner for the work to be performed, and to grant appropriate access to DEP and contractor personnel. Please arrange for this License Agreement to be signed by an authorized representative of the Building owner and returned to R. Radhakrishnan, P.E., NYCDEP, 59-17 Junction Boulevard, 8th Floor, Corona, NY 11368. In order that the work may be performed as expeditiously as possible, please return the signed License Agreement within five working days of receipt. Also, please remember to fill in the address to which notices should be directed in item 10 of the License Agreement.

Within five working days of returning the License Agreement to DEP, please call (718) 595-3682 to arrange for a work schedule and to designate a liaison, who should be an individual at the building who is available between 8 am and 8 pm, seven days a week. The cleaning work will require a source of electrical power and water at the Building, and may entail the erection of temporary scaffolding for workers to access the affected surfaces. Please be prepared to discuss these and any other considerations you are aware of which may affect the cleaning.

If you have any questions concerning the foregoing, please do not hesitate to contact DEP at the above-specified number. We appreciate your courtesy and attention to this matter.

Sincerely,

R. Radhakrishnan, P.E.

Director

Asbestos Control Program
