TAYLOR ENVIRONMENTAL GROUP, INC.

October 1, 2001

Mr. Alex Lempert
New York City School Construction Authority
Industrial and Environmental Hygiene
30-30 Thomson Avenue
Long Island City, NY 11101

RE: Cleaning at Stuyvesant High School (Sixth through Eleventh Floors)
345 Chambers Street, New York, New York 10003

Dear Mr. Lempert,

Cleaning work was performed at the above referenced facility on the 6th, 7th, 8th, 9th, 10th and 11th Floors from September 26 through October 1, 2001. Trio Asbestos Removal Corporation and Kiss Construction acted as the General Contractors and Taylor Environmental Group, Inc. and ATC Associates performed project supervision and air monitoring at the completion of the general cleaning work.

Based upon the final visual inspection and results of air samples collected, floors six through eleven at Stuyvesant High School have met re-occupancy criteria as defined in all applicable federal, state and local regulations.

If you have any questions, or require further information, please do not hesitate to call. I hope we have satisfactorily assisted you in your environmental health concerns.

Sincerely,

George Taylor
Laboratory Director
TAYLOR ENVIRONMENTAL GROUP, INC.

130A JERICHO TPKE., FLORAL PARK, NY 11001 • PHONE (516) 358-2955 • FAX (516) 358-1780

TAYLOR ENVIRONMENTAL GROUP, INC.

October 4, 2001

Mr. Alex Lempert
New York City School Construction Authority
Industrial and Environmental Hygiene
30-30 Thomson Avenue
Long Island City, NY 11101

RE: Cleaning at Stuyvesant High School (Ground through Fifth Floors)
345 Chambers Street, New York, New York 10003

Dear Mr. Lempert,

Cleaning work was performed at the above referenced facility on the Ground, 2nd, 3rd 4th and 5th Floors from October 1 through October 4, 2001. Trio Asbestos Removal Corporation and Kiss Construction acted as the General Contractors and Taylor Environmental Group, Inc. and ATC Associates performed project supervision and air monitoring at the completion of the general cleaning work.

Based upon the final visual inspection and results of air samples collected, floors six through eleven at Stuyvesant High School have met re-occupancy criteria as defined in all applicable federal, state and local regulations.

If you have any questions, or require further information, please do not hesitate to call. I hope we have satisfactorily assisted you in your environmental health concerns.

Sincerely,

George Taylor
Laboratory Director

Re: Clean-up at Stuyvesant H.S.
345 Chambers Street, New York, NY

Dear Mr. Radhakrishnan:

In response to a request from the Board of Education, the SCA will proceed with clean-up of the subject school.

Work will be performed in two phases. The first phase will consist of cleaning the 6th through 11th Floors, including the roof. The second phase will be from the 1st through the 5th Floor.

Work will commence tomorrow, Wednesday, September 26, 2001 at 10:00am and will continue until completion.

The scope of work includes the cleaning approximately 50,000 square feet. We will utilize two contractors, Trio Asbestos Removal Corp. and Kiss Construction Co. The consultants will be ATC Environmental and Taylor Environmental Group.

Based on our discussion, the SCA will isolate the 6th floor from the rest of the building and we will use one decon per floor.

On the first day of work, we will perform monitoring outside the building. At the end of the clean-up, we will perform clearance monitoring. All results will be provided to the DEP.

If you should have any questions relating to the above information, please feel free to contact me at (718) 472- 8501. Thank you.

Sincerely,

Alexander Lempert
