Attention: Mr. Radhakrishnan, Acting Director

RE: Variance No.: 0250MN03
TRU No.: 0146MN03
Federal Hall Building
26 Wall Street
Manhattan, New York

Dear Mr. Radhakrishnan:

On February 4, 2003, the areas affected by the referenced variance were inspected by Mr. Vincent Masullo from your office. Representatives from the National Parks Services (owner) and Langan Engineering and Environmental Services, Inc. (Langan) accompanied Mr. Masullo at the time of inspection. Per our discussions during the site visit, the following items of the submitted variance application need to be amended, and also provides clarification of the work sequence.

1. In the ACP9 application, variance was requested for Section 1-91 (k). Please delete the request for this section, as it would not be applicable for this project. Efforts shall be made to maintain four to six air changes within the work areas. Also disregard the exhaust layout shown on Figure AR-3. The installation of the ventilation equipment exhaust shall be done in accordance with Sections 1-91 (k) and 1-91(l).
2. Langan also requests a variance for Sections 112 (d) and 112 (e) of Title 15, to reduced waiting time between cleaning from 12 and 4 hours to 4 and 2 hours.
3. Please note that the vast majority of the piping within the subbasement work areas is wrapped with fiberglass insulation. Once the decontamination units have been installed, work areas preparation is completed, and engineering controls established; pre-cleaning activities shall be performed. The fiberglass insulation shall be removed as a part of

www.langan.com

precleaning work activities. Upon completion of the precleaning activities, the Contractor shall submit a written request to the on-site owner's engineer for a precommence inspection. After receiving written authorization from the owner's engineer, the contaminated soil shall be removed in accordance with Attachment CRS. Upon completion of the soil removal work, the work areas shall be re-inspected by the owner's engineer. Only after receiving written authorization from the owner's engineer, the contractor shall proceed with the asbestos pipe insulation removal work in accordance with attachment P. All waste removed from the work areas shall be disposed off as asbestos containing waste. Movable items to be removed shall be thoroughly cleaned and decontaminated prior to its removal from the work area.

If you have any questions or need additional information, please contact the undersigned at (201) 398-4544

Very truly yours,
