ISSUED TO:

Herbert Moskowitz
70 Lafayette Street
New York, NY 10013

Pursuant to Section 25-310 of the Administrative Code of the City of New York, the Landmarks Preservation Commission hereby approves certain alterations to the subject premises as proposed in your application completed on August 27, 2002.

The approved work consists of cleaning the roof of the building of debris related to the collapse of the World Trade Center, including collecting all loose debris, washing loose gravel, and wet wiping other surfaces, as described in specifications prepared by the City of New York Department of Environmental Protection and submitted as components of this application.

In reviewing this proposal, the Commission noted that the designation report describes 92 Reade Street as an Italianate/Second Empire store and loft building designed by John B. McIntyre and constructed in 1878. The Commission also notes that there is some debris on the roof.

Staff has reviewed these specifications and finds that the work on the roof will not require the removal of any significant protected architectural material; that it will not detract from the architectural character of the building or streetscape; and that cleaning the roof will bring the building closer to its historic condition. Therefore, the Commission has no objection to the work proceeding at this time, or the issuance of permits by any other city agency.

A copy of this permit have been sent to the Department of Environmental Protection.

This permit is issued on the basis of the building and site conditions described in the application and disclosed

during the review process. By accepting this permit, the applicant agrees to notify the Commission if the actual building or site conditions vary or if original or historic building fabric is discovered. The Commission reserves the right to amend or revoke this permit, upon written notice to the applicant, in the event that the actual building or site conditions are materially different from those described in the application or disclosed during the review process.

All approved drawings are marked approved by the Commission with a perforated seal indicating the date of approval. The work is limited to what is contained in the perforated documents. Other work or amendments to this filing must be reviewed and approved separately. The applicant is hereby put on notice that performing or maintaining any work not explicitly authorized by this permit may make the applicant liable for criminal and/or civil penalties, including imprisonment and fines. This letter constitutes the permit; a copy must be prominently displayed at the site while work is in progress. Please direct inquiries to John Graham.
