Bulk Sampling

The report says, "158 bulk samples were analyzed via PLM and I have found 157 bulk samples analyzed and the results were the same with report."

Air Sampling

Even though the report says, "170 air samples were collected and analyzed via TEM technology," I have found the results of 155 air samples taken from 32 different floors and the results were the same with report.

MEETING ANNOUNCEMENT

**ENVIRONMENT and HEALTH in LATIN AMERICA – SITUATION, TRENDS
AND NEEDS**

October 25, 2001

**Sponsored by
THE INTER-AMERICAN ASSOCIATION OF
SANITARY AND ENVIRONMENTAL ENGINEERING (AIDIS-USA)**

Mr. Horst Otterstetter, President of AIDIS-USA, President-elect of AIDIS Inter-American and former Director of Health and Environment of the Pan American Health Organization, will give a presentation on the relation between the environment and human health of Latin America. This presentation will include the situation of the water, sanitation and solid waste sectors and some aspects of the environmental quality management. Data about sector performance and the needs for institutional and sector development will be discussed. The presenter will also present some of the plans and programs of AIDIS-USA and AIDIS Inter-American for the near future. This should be of great interest to engineers, scientists, and others who have an interest in environmental issues in Latin America, including those who have interest in identifying business opportunities.
