Re: 213 Pearl St. asbestos notice

Mr. Radhakrishnan,

Today I received a notice dated Feb. 20 about an inspection at my building concerning the roof and gutters. My tenant mailed me the papers after they were left on the mailbox. It is the first such notice of any kind that I have received.

I have since spoken to Penny in your office and she explained that this material needs to be tested for contamination. The results are unknown at this point but it is assumed that it is asbestos.

I would appreciate more time to research ways to handle this in a cost effective way. Since 9/11 there have been some circumstances at my building, some related some not, that have made finances very tight. I also need to speak to my insurance carrier.

Please make note of my response and know that steps are being taken to remedy this situation.

Thank You,
