Re: Proposed Scope of Work in the elevator shaft, on the entrance landing and roof at 150 Franklin Street, NYC.

Dear Mr. Lutchmedial:

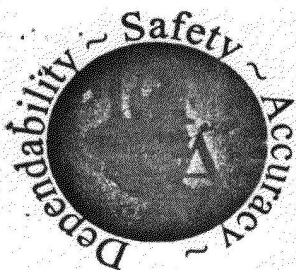

I am submitting for your approval a work plan for the emergency clean up of asbestos containing dust from the elevator shaft at the above address. We propose the following:

1. Clean up will be performed by a licensed asbestos abatement contractor using NYC DEP and NYS DOL Certified Asbestos Handlers.
2. Work area will be defined as the roof entrance landing and elevator shaft.
3. An airlock will be constructed at the doorway to the elevator machine room in the basement and on the roof.
4. All electric will be supplied by the building and all extension cords will have ground fault interrupters.
5. Once the air locks are set up, clean up will begin following clean up procedures in NYC Title 15, Chapter 1.
6. Critical barriers will be placed in the basement of the elevator shaft and on the skylight
7. Area air monitoring and OSHA monitoring will be performed during the clean up.
8. Upon achieving visual clearance on all floors of the elevator shaft TEM air sampling will be performed on each floor.
9. All removal and air monitoring will be performed in accordance with NYC Title 15, Chapter 1.
10. All clearance air sampling and waste manifests will be forwarded to the building owner upon completion.
11. An Emergency Notification will be sent to the NYC DEP within 24 hours of the start of the project. The Notification will be for the emergency clean up of 8,500 square feet of asbestos containing dust.

Very Truly Yours,

A handwritten signature in black ink that reads "Timothy J. Donohoe".

Re: Emergency Asbestos Clean up @ 150 Franklin Street, New York, NY

Dear Sir:

Please be advised that D.S.A. performed and Emergency Asbestos Clean up at 150 Franklin Street, New York, NY, on Thursday 4/18/02 through Saturday 4/20/02. An official from the NYC DEP and the US EPA supervised the abatement.

The emergency was due to the asbestos debris from September 11, 2001, that blew onto the building and was tested to show that asbestos was present on the roof, elevator shafts and front of the building and the basement. The work that was conducted on Thursday was the clean up of the entire roof, basement area and the outside of the building. The elevator had a mechanical breakdown, so we returned on Friday, 4/19/02 to clean the elevator shaft walls and windows. D.S.A. Services, Inc. also returned on Saturday, 4/20/02 to encapsulate the elevator shaft.

Should you have any questions regarding this matter, please feel free to contact our office at any time.

Sincerely,

A handwritten signature in black ink, appearing to read "Anthony Frassetto", written over a horizontal line.
