E.P.A. & O.S.H.A. Certified Asbestos & Lead Paint Abatement

October 16, 2002

Dilshad
US EPA
290 Broadway
New York, NY 10007

**Re: WTC-ARC
Kiss Construction Inc.**

Attention: Dilshad

As per our conversation earlier today the following is a list of items that Kiss Construction Inc. would like to bring to your attention:

1. Apartment Size

Kiss Construction Inc. has completed work in apartments that are oversized. In some cases two apartments have been converted into one large apartment for example one apartment completed earlier this week was over 3,600 square feet.

2. Balconies/Terraces

The average size balcony/terrace is 20 Square feet (walkout). In some apartments that KCI has already completed, the balcony/terrace has exceeded the average size. In some apartments the balcony/terrace is 600 square feet or more which KCI would regard as a patio/deck.

3. Carpet

Removing carpet with 9x9 VAT Tiles underneath will cause:

- A Hazardous Situation
- Glue (mastic) to remain on the substrate: Kiss Construction Inc. will not be held responsible for the removal of the glue, edging around the perimeter of the room or the door saddles.
- Damage to the substrate: KCI will not be held responsible for any damage due to the removal of the glued on carpet.

The removal of carpet from the common spaces was not mentioned in the NYC DEP contract scope of work, KCI did not make allowances for this in our bid.

4. Manifest

Kiss Construction Inc. has not yet been given the details for the manifest.

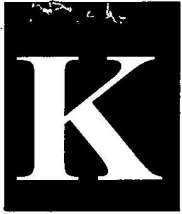

If you have any questions regarding the above matter please call the undersigned at,
(718) 366-2090.

Sincerely,

Brendan Lawless

E.P.A. & O.S.H.A. Certified Asbestos & Lead Paint Abatement

GARRETT MEEGAN, DIRECTOR OF OPERATIONS

As the Director of Operations for Kiss Construction, Inc., Garrett Meegan is responsible for planning and implementing the actual abatement strategy once a project is awarded. Managing all phases of work execution including close supervision of labor, coordination of schedules with building owners and consultants, and on-site project documentation.

With over ten years of experience in the Asbestos Abatement and Lead Paint Abatement industry as foreman, project supervisor and project manager on work sites throughout the New York City area, Mr. Meegan has gained an extensive amount of experience.

A native of Ireland, Mr.Meegan pursued a career in the Environmental Industry working four years with BRAND and working with EWT Contracting Inc., for two years as a supervisor.

On a daily basis, Mr. Meegan serves as Kiss Construction's regulatory advisor and is well versed and current on the ever changing regulations governing asbestos abatement and Lead Paint Abatement..

Having joined Kiss Construction in 1995, Mr. Meegan is now an integral part of its daily operations.
