Test Results Request

EPA has divided lower Manhattan into four quadrants to facilitate management of the Residential Indoor Air Assistance Program. These quadrants follow postal ZIP code boundaries ([view map](#)) and are roughly equal in population size. The table below shows the number of residences to date that have registered for assistance. Residents may request cleaning and testing or testing only, reimbursement for a HEPA vac and/or an information packet. Requests for assistance are also shown by ZIP code and by quadrant. The table updates automatically as new residences are registered.

Note: The "Whole Building Count" is the number of buildings where building owners or managers, coop boards or tenant association representatives have requested that cleaning within the building be coordinated. A request for whole building coordination does not mean that every residence in that building will necessarily be cleaned.
