Re: Memorial Monday, May 28
SPIDERMAN day shoot in
Times Square: Street cranes

This holiday weekend is customarily the best low traffic weekend for big action scenes to get done with minimal impact. This scene is the landscape for a major sequence created with visual effects. It consists of moving shots from an aerial camera suspended on cabling between two large industrial cranes. One crane would be located on the west side of Seventh Avenue at 47th Street and cabled to the second crane placed on 45th Street at Broadway. The camera rig is remote controlled by computer.

The cranes would be placed after 6 p.m., Sunday night, May 27. Broadway would be diverted above 47th by traffic agents for one hour while the cable is rigged between the two cranes, between 9 and 10 pm. Later Sunday night, the camera rig would be assembled on the cable. Eleven Traffic agents would assist PD Movie & TV officers.

Marriot Marquis Hotel taxi drops and pick-ups would approach the Hotel from 8th avenue via 46th Street and depart via 45th to the west. The Hotel Manager is okay with this. The Imperial theater on 45th Street near 8th (Les Miz) has an 8 p.m. on Monday and we can get their audience in and out from 8th Avenue.

During camera rolls, on Monday May 28 daytime, each lasting for two traffic light changes, Broadway traffic would be held, or diverted with 16 traffic agents assisting the Movie & TV Police.. When camera is between shots (most of the time), Broadway would flow unimpeded.

The size of the industrial cranes requires closing 45th between Broadway & 8th from Sunday night at 6 p and all day Monday the 28th. The second crane at 47th and 7th has been cleared by MTA for weight, and will take three of the five southbound Seventh Avenue lanes. The cranes are supervised by licensed master riggers, in addition to the special film riggers to operate these cable run camera rigs. The de-rigging of the cable and the removal of the cranes would take place overnight Monday.

The shots will give bird's eye views of Spiderman's trajectories in a battle with the Green Goblin, however the live actors are not present in these shots. Much of the live action to be added to this work has already been filmed in California, and the production is anxious to get our answer on this request as quickly as possible. Many thanks for your assistance.

Re: Alphonso R. Lopez

I am forwarding, for your review, my candidate for the position of Deputy Commissioner for Wastewater Treatment. I have enclosed Mr. Lopez' resume and a brief description of the duties and responsibilities of the position follows:

Deputy Commissioner for Wastewater Treatment

Under executive direction, with the widest latitude for independent judgement serves as the head of a major bureau, overseeing the operation and maintenance of the City's 14 water pollution control plants, related facilities and marine vessel operation; makes final recommendation to the Commissioner concerning an unusually complex, technical, and highly controversial series of programs concerning Federal and State water quality based permits; and formulates administrative and operational policy related to the productivity of a staff of 1,913 employees with an annual expense budget of \$250 million .

PII

(718) 595-5049 (Work)

PII

EXPERIENCE: NEW YORK CITY DEPARTMENT OF ENVIRONMENTAL PROTECTION
(28 years)

Bureau of Wastewater Treatment

Deputy Director, Facilities Operations: 1991 - Present

Chief administrative engineer of a major DEP program involving all operations and maintenance activities including process monitoring and control of treatment process for the City's fourteen (14) wastewater treatment facilities, eight (8) dewatering facilities, five (5) process control laboratories and three (3) microbiology laboratories. Staff is 1200 allocation composed primarily of skilled trades but includes managerial, technical and professional staff as well as administrative management personnel. Personnel services and OTPS budgets are \$ 60 million and \$ 48 million annually.

Accomplishments:

- Manage on a day-to-day basis the operations and maintenance of one of the world's largest wastewater treatment systems.
- Initiated and directed Bureau "Assessment" to compare Bureau practices to those in private wastewater treatment industry.
- Initiated and directed "Re-engineering Study" for analysis of the Bureau's management and organizational structure and activities.
- Initiated Maintenance Benchmarking Project and directed implementation of findings.
- Initiated development of RFP for next generation Computerized Maintenance Management System (CMMS) to handle all Bureau maintenance activities.
- Initiated consolidation of Collections Facilities Operations crew quarters to improve deployment of field staff from centralized facilities.
- Initiated PM/CM and resource utilization tracking program for Collections Facilities Operations.
- Successfully negotiated allocation of duties and responsibilities between various Local 3, I.B.E.W. staff within the Bureau.

Administrative Responsibilities Include:

- Planning Long Term Budget and Staffing.
- Manage Bureau Resources to Ensure Effective Utilization of Staff and Budget.
- Manage Preventive and Corrective Maintenance Programs.
- Direction of Process Engineering and Control Activities.
- Planning and Formulation of Construction Programs (Capital and Expense) for Facilities' Maintenance.
- Frequent Interaction with Bureau of Environmental Engineering in Facility Planning, Design and Construction of Treatment Plant Reconstruction Projects.
- Represent the Agency before other City Agencies, Community Groups and Elected Officials.
- Dialogue, Interaction and Negotiations with Unions representatives.

Chief, Division of Sludge Engineering & Planning: 1989 - 1991

Chief administrative engineer of division responsible for development and execution of the City's Land Based Sludge Program.

Played lead role in the restructuring of the City's program, as a direct result of the Ocean Dumping Ban Act (1988). Met with and coordinated activities with directors of various City agencies as well as public officials and their representatives in order to fast track the various phases. Responsibilities included extensive involvement with the public, including community groups, CAC and Borough President representatives.

Administrative and Technical Responsibilities Included:

- Directed Planning, Design Review and Initiation of Capital Construction for Dewatering Facilities.
- Represented City as Lead Negotiator of Sludge Services Contracts.
- Coordinated Development of Environmental Impact Statements for Phase I & II of the City's Sludge Program.
- Coordinated Technology Researches and Evaluations as well as Site Selection Activities.

Chief, Division of North Operations: 1986 - 1989

Chief administrative engineer of a large division, responsible for all maintenance and operations activities of four major water pollution control facilities, treating approximately 45% of the City's 1.7 billion gallons of sewage per day. Staffing included a total of 383 full time personnel, at an annual personal services budget of over \$10 million.

Administrative & Technical Responsibilities Included:

- Planning of Immediate and Long Range Budget and Staffing Requirements.
- Formulation of Construction / Rehabilitation Programs.
- Direction of Resource Utilization for Operations vs Maintenance Needs.
- Coordination of Safety and Training Programs.

Bureau of Water Pollution Control**Chief, Process Control Section: 1981 - 1986**

Chief engineer of a section directing a staff of engineers and technicians in the control of all process monitoring and operations for the City's fourteen (14) water pollution control plants.

Administrative & Technical Responsibilities Included:

- Directed Planning and Execution of Projects and Research Studies to Optimize plants' performance.
- Compliance with SPDES Permit Self-Monitoring and Reporting Program.
- Formulate and direct implementation of Process Control strategies for those areas affecting plants' performance levels.

Process Control Engineer: 1977 - 1981

Responsible for operational processes at four of the City's wastewater treatment facilities with a combined flow of approximately 300 million gallons per day. This included day-to-day analysis and evaluation of plant operations to insure the efficient utilization of resources.

Bureau of Sewers:**Project Engineer (Drainage Basin Planning and Sewer Maintenance Sections): 1975 - 1977**

Responsible for the management of the Inflow/Infiltration studies for two major Brooklyn drainage areas in New York City (Owls Head and Coney Island).

Project Engineer (Design and Review Section): 1973 - 1975

Responsible for the direction of a staff of engineers and engineering technicians engaged in the design and design review of numerous projects.

EDUCATION:

New York University - B.S. Civil Engineering - June 1973

OTHER:

- Top 40 Management Program - N.Y.C. Department of Personnel
- Strategic Planning - N.Y.C. Department of Environmental Protection
- Licensed Professional Engineer, New York State (1978)
- Licensed Grade 4A Sewage Treatment Plant Operator, NYS (1980)
- Member of Water Environmental Association
(Served as Chair on Board of Directors of Metropolitan Chapter. Currently, on State Wastewater Facilities Committee and Chairman of State Scholarship Committee)
- Authored and co-authored several technical papers in the field of Water Pollution Control and presented papers on state and national levels.

PII

Re: Acct

PII

Dear Mr. Martinez:

I have been advised by the Mayor's Office that you recently complained about a high water bill. The Mayor's Office asked that I review your account and respond directly to you. I checked the records for your property and my findings are noted below.

The records indicate that you have been billed on actual meter readings since August 1994. Your average daily consumption has fluctuated over the period, but with the exception of a few quarterly billing periods, it has been in line with other 1-family homes. I see that the following bills showed a higher than normal level of consumption:

- Sept. 1998: this may have been caused by seasonal usage over the summer months.
- Dec. 1997
- Sept. 1996: this may also be a seasonal usage issue.
- March 1996
- Sept. 1995: possible seasonal usage.

Your current consumption is 0.21 hundred cubic feet (hcf) per day. The consumption over the last 4 quarters, prior to the June 1999 bill, was 0.40 (March 1999), 0.55 (Dec. 1998), 0.82 (Sept. 1998) and 0.61 (June 1998). With the exception of the Sept. bill which may reflect seasonal usage seen on this account each year, your consumption is within the range for a 1-family dwelling.

Consumption may be affected by a number of factors, including the number of people residing in the home, their water-consuming habits, the presence of high water-consuming fixtures and/or appliances and leaks. While your consumption is low at this time, you may want to participate in DEP's free Residential Water Survey. Our contractor, Honeywell DMC, will inspect your home for leaks, install low-flow shower heads and faucet aerators and provide water-saving information to you. There is no cost to you for this service. You can schedule an appointment by calling (718) 326-9426.

59-17 Junction Boulevard Corona, New York 11368-5107

In the event that you previously had leaks that have been repaired, you may qualify for an adjustment under the Water Board's "leak forgiveness" program. In order to qualify, you must provide DEP with copies of any repair receipts associated with the plumbing. The bill must be less than two-years old to be eligible for an adjustment, if all the other eligibility criteria are met.

My review of the account could find no indication of any inquiry to DEP and our payment records fail to identify any payments dating back to 1994 when the Dept. of Finance transferred billing responsibilities to DEP. At that time, you had an open balance of \$101.23. Since that time, billing has continued quarterly and your current open balance is \$4,703.69, which includes \$1,020.96 in late payment charges. The Water Board caps the annual charges for a 1-family dwelling at \$780. In order to qualify for this cap, you must have participated in the Residential Water Survey program to validate that the property is free of leaks. Your consumption, and the associated billing over the last 12 months are less than this amount so no adjustments would be made on prior bills. You may qualify for the cap for future bills.

Based on my review of your account, I find that the charges are valid and due to the NYC Water Board.

The NYC Water Board allows for an appeal of my decision to their Executive Director. I have detailed the appeal process below for your information.

Final Appeal

If a customer disagrees with the decision rendered by the Deputy Commissioner of BCCS, the customer may appeal such decision by submitting a written request to the Executive Director of the New York City Water Board within 30 days. The Final Appeal must include the identification of the property (street address, account number) and charge which the customer is disputing, a statement of the reason or reasons why the customer believes the decision with respect to the initial appeal was incorrect, and a copy of such written decision. The Executive Director shall render a decision in writing within 60 days of receipt. If circumstances within the control of the customer, including but not limited to failure to provide access to a premise or a meter, prohibit the Executive Director from making a decision, the customer shall be notified in writing stating why a decision cannot be rendered. If the Executive Director determines that the questioned charges are correct, the charges shall be due and payable as set forth on the bill and/or delinquency notices. If the questioned charges are determined to be incorrect, appropriate remedial action shall be taken including the issuance of cancellations and/or corrected bills, and providing information relating to requests for refunds or credits.

Disposition of Interest During the Appeals Process

1. Customers are advised to pay all charges and appeal afterward. During the appeals process, interest charges on unpaid bills shall continue to accrue until the

- bill is paid in full;
2. If a customer decides not to pay a bill and in the case of appeal being decided in favor of a customer, all interest charges in connection with the disputed bill shall be waived.
 3. If a customer decides not to pay a bill and in the case of the appeals process taking longer than the time periods specified, except as noted above due to circumstances within the control of the customer, all interest charges in connection with the disputed bill shall be waived.
 4. If a customer decides not to pay a bill and the questioned charges are determined to be correct, interest shall accrue from the original due date of the bill until the bill is paid in full.

If you choose to file an appeal, please submit it to: Diana Chapin, Executive Director
NYC Water Board
59-17 Junction Blvd., 8th Floor
Corona, NY 11368

The appeal must be filed within 30 days of the date of this letter. Please include a copy of this letter with your appeal.

Sincerely,

Lawrence Schatt
Deputy Commissioner

MEMORANDUM

February 18, 1999

TO: Anthony Carbonetti
FROM: Joel A. Miele Sr., P.E. 
SUBJ: Louis Tazzi

The Department of Environmental Protection has selected Louis Tazzi to fill the position of Administrative Staff Analyst M-VI at \$107,402 to serve as Deputy Commissioner of Management and Budget, for the Bureau of Management and Budget.

Mr. Tazzi has been employed by the Department of Environmental Protection since July 1983 serving in positions that have continually increased in scope and responsibility. As Deputy Commissioner of Management and Budget, he will manage, direct and oversee the administrative and managerial operations of the Agency's Human Resources Management, Labor Relations, Facilities Management and Construction, Fleet Administration, Fiscal Services, Expense Budget and Management Analysis.

Mr. Tazzi had demonstrated that he has the requisite technical, supervisory and managerial skills necessary to be effective in this position and the Department strongly endorses this promotion.

Re: Job Applicant - Mr. John Sullivan

Dear Mr. Carbonetti:

My office was recently contacted by Mr. John Sullivan who is seeking a position with the New York City Department of Environmental Protection.

On August 16, 1997 Mr. Sullivan's resume was forwarded to Ms. Carmela Piazza, who in turn referred my request to you. To date, Mr. Sullivan has not received any other information regarding his status for employment with the Department of Environmental Protection.

Any consideration you are able to offer at this time in respect to Mr. Sullivan's request for employment with the NYC Department of Environmental Protection would be greatly appreciated. Should you have any questions or require additional information, please do not hesitate to contact me.

Very truly yours,

John A. Fusco
Councilman
