<< File: 114 Liberty St Monitoring 2 6 03.doc >>

I have incorporated the changes sent over by Mark and Chuck. I spoke to Chuck regarding the asbestos sampling and the flow rate issue they raised. Chuck stated we could leave as is - he didn't realize number 2 was "during sampling" and therefore a different set of sampling. The rest of the comments were fine and I replaced the existing language. We still need to wait on their attachments. Also, I added the row to Table 1 and referenced the table at both the asbestos and other parameter sections. Any other comments?
