Subject: Request for inspections

Krish,

I received a call from Charles Sturcken and he gave me two complaints regarding WTC debris. The first one is on the top of a newspaper stand at the corner of John and Broadway. The second is on top of a telephone booth at 176 Broadway (eastside). Apparently, people are looking out of Their windows and calling him regarding debris that they see.

A third complaint was phoned in from DCAS and involves suspected debris at 156 William Street. The debris is on the second floor ledge facing William Street. Please have an inspector check out this location and let me know the findings.

Thanks
