

EPA Cate Jenkins

These original World Trade Center documents have been collected and scanned by the New York City Law Department. **DO NOT DISPOSE OF THESE DOCUMENTS:** they must be preserved to serve as evidence in the event of future WTC-related legal actions are brought against the City. If you would like to dispose of any of these documents, contact me directly at the New York City Law Department at (212) 341-3713.

Table B – ASBESTOS AIR CONCENTRATIONS AND RISKS

Excess Cancer Risks, Lifetime Exposure (70 years)²⁷	Air Level - fibers per milliliter, PCM equivalent f/mL (PCM)	Air standards, levels actually found, detection limits, etc.
		YOU MUST CONVERT STRUCTURES PER MILLILITER TO "PCM-EQUIVALENT" FIBERS PER MILLILITER BEFORE USING THIS CHART. Unless you have actual data, divide s/mL by around 2 to 4 to convert to "f/mL PCM"
1 per 100	0.04	EPA's Integrated Risk Information System (IRIS) cancer risk level
	0.0095 - 0.019	AHERA level of 70 structures per square millimeter, converted to PCM-equivalent fibers per milliliter. Over 2 cancers per 1000.
1 per 1,000	0.004	EPA's Integrated Risk Information System (IRIS) cancer risk level
	0.0011 - 0.0043	Region 2's detection limits, converted to PCM equivalents (25 to 50% of fibers estimated to be PCM equivalent). THE LOWEST LEVEL THEY COULD FIND. Up to 2 cancers per 1000.
	0.0024	Libby Superfund site, average inside homes resulting in Superfund designation. Approaching 1 cancer per 1000.
1 per 10,000	0.0004	EPA's Integrated Risk Information System (IRIS) cancer risk level²⁸
1 per 100,000	0.00004	EPA's Integrated Risk Information System (IRIS) cancer risk level
1 per 1,000,000	0.000004	EPA's Integrated Risk Information System (IRIS) cancer risk level.
	0.000003	inside air, Agency for Toxic Substances and Disease Registry, peer reviewed overall value. Less than 1 cancer per 1 million.
	0.000002	outside air, Agency for Toxic Substances and Disease Registry, peer reviewed overall value. Less than 1 cancer per 1 million.
0 cancers	0	AHERA safe level standard, 40 CFR §763, Appendix C - Asbestos Model Accreditation Plan
	0	Asbestos School Hazard Detection and Control Act safe level
