Subject: Memorandum - Testing Carpet, the Asbestos

Reservoir - Jenkins 6/9/02

(See attached file: Reservoir-6-9-02-jenkins.pdf)

Attached is a memorandum titled:
Testing Carpet, the Asbestos Reservoir

The memo explains EPA's ultrasonication test for carpet and other woven fabrics, how to get the test (you don't need to hire a consultant) and how to interpret the results, in terms of health risks.

The memo also discusses one apartment buildings' experience with the ultrasonication carpet test, finding high levels, even though this apartment was 8 blocks north of Ground Zero.

The memo also discusses the widely different health risk levels developed by Region 1 for the Brookfield school system and by Region 2 for fallout from the WTC.
