- EPA Cleaning Protocol

Dona > contrast proposal for sampling
A few issues remain re lead
Distributions

effort work plan will be
Early next week 110 liberty st

3. Exterior Cleaning Update - NYCDEP

give update on proposed procedures and legal delay

4. Chemicals of Concern

- comfort level
- what to sample for if we do immediate cleaning

Bridge plan
Short term cleaning and or sampling
I still discussing

5. Recommendations for air conditioners

Don't do Draft

HVACS?

6. Peer Review

- what should we cover

will not slow process done greatly

7. Preparation for Task Force Meeting on Monday, April 22

8. Schedule Next Meeting Date

Thurs. next

Background
Does the group
want to go outside
the borough of
Man. Hygiene
lost
Tennants
Background vs
potential Exposure

K value is
can be used
what is known
in literature
contraction &
consultants tally
EPA that no correlation can be
made between what is in dust
& what is airborne OSHA
two samples that show off
working having been exposed to
nothing

Cleaning Program or Sampling to make

people feel better

Asbestos in air => good consensus

out to store
do air because
public is concerned
use aggressive sampling

Peter D concerned about getting stuck in loop

Dust sampling => no consensus is very debatable

concerns about people entering doing air sampling because they
are concerned about dust.
