

***PAHs (settled dust)**

Tier	Screening Value	Basis	Action
I	$>9 \text{ mg/m}^2$	**Risk-based screening level for residential setting (E-04 x 1yr)	Aggressive cleaning - if levels persist, take additional action to reduce exposure
II	$.3 \text{ mg/m}^2 - 9 \text{ mg/m}^2$	$.3 \text{ mg/m}^2$ - **Risk based screening level for residential setting (E-04 x 30 yr)	Maintain recommended (diligent wet/HEPA) cleaning methods -consider additional monitoring
III	$<.3 \text{ mg/m}^2$ (or background)	Determination of local background	No further action
