Lab specialists

Air Circulation Systems - Building Owners are advised that air circulation systems not operated since Tuesday must have their filters replaced before the system is restarted. Systems shall be run on a re-circulated air setting and not on fresh air, if possible, until the WTC fire is extinguished.

Open Water Tanks - Bldg owners are advised that water tanks not operated since Tuesday must be completely drained from the cellar, flushed, cleaned, refilled + plumbing systems flushing before having the bldg reoccupied. You should contact the water tank cleaner who normally performs this yearly operation for you to arrange for this cleaning, if possible.

All other water pressure, sewage, noise + air quality complaints should be directed to DEP NOLP.

reenergized mass for gas -

In order to re-energize - need to isolate each bldg

SBA Disaster Relief

leave new bldg
Generator - leave bldg
- ST lights on -
Small burner
+ traffic lights

Isolate pipes - Oil pipes freeze -

Need a basket -

Put on a list -
