9/22/01

(call only if really necessary) →

- 1) Due to heavy rain the particulates in the air have dissipated — No need to worry
- 2) Water in lower Manhattan tested yesterday — It is clean.
- 3) Battery Park City residents — Their water has been continually running; Tank should be cleaned though.
Also, Tenants should run all the taps in the apt until water runs clean
- 4) DEP — gives status on asbestos in air — Bldg. owners shld. have an R.A., or P.E., Asbestos inspectors review indoor asbestos contamination prior to any clean up.

To have one's apt. Tested for asbestos,
Tenant should / or owner of bldg. should
have either 1) a "Certified
Investigator" — certified by NYCDEP;
or 2) a "Certified Inspector" —
certified by NYS Dept. of Labor.
In both cases (Cert. Investigator +
Cert. Inspector) need to be certified
by NYCDEP as a Air Technician

Call 718-NYC-DEP-HELP +
They will connect you to an
Asbestos person at DEP.
