Rose,

fyi. this sent to Larry Montanez, who used to work for Dale Way and came to at least one of the training sessions. He is giving an ICAR (well know training organization in body shop industry) workshop this thursday and wanted info on compliance re used rags and disposal of fluorescent bulbs. I referred him to DEC and EPA; also, this website has info on compliance for rags.

Larry,

Here is the EPA website I mentioned that addresses best management practices for auto repairs shops, including collision shops. This site also has a link to the CCAR website which has information (see the "Virtual Automotive Repair Shop" section) on compliance requirements for used rags. I hope this is helpful and it was nice to hear from you.

Take Care,

Bruce
