Dust (AQ)

Question: The wrong telephone number was given
for right contact — DEPHelp. The message
was the number was not in service.

Answer: Took the callers contact information
and told them to expect a follow-up
call from us.

Comments: She wanted to register a complaint
that the Barge noise and dust is a problem.
May not have dialed area code 718

3/15 - called
back - N Answer
3/16 - left
message on her
Vm -
(unattached)
Also gave ABC #
for barge

Information From Luis Rueda, Department of Design & Construction

(DDC) 212- 640-9065 (If necessary, can call his Cell Phone: PII)

PII - Person who can answer questions about the barge - docked east of Pier 25.

On Monday, 3/11, he met with the Lower Manhattan Tenants Assn. And agreed to do the following:

- 1) Built a plywood fence to separate area in front of Stuyvesant H.S. from the pier.
- 2) Are paving the pier (to reduce dust from an unpaved street) and expect to complete it over the weekend. Have installed a storm sewer to capture the water used to wet down the trucks, etc.
- 3) Wetting down West St. to minimize the dust and eliminate the mud.
- 4) Place rubber on the buckets/pans of the cranes to reduce noise when they bump into each other. Also to place rubber around the barges to reduce noise when they bump into each other.
- 5) Install a "Deluge System" to spray water on the cabs of trucks to wet the dust.
- 6) Also use the "Deluge System" to spray the debris as it is being unloaded into the barge.
- 7) The average number of barges that are filled each day is ~~four~~⁶.
