Question:

Concern is with the indoor air quality in the 101
Stock Exchange (11 Wall St., corner Broad). Wants to know

whether indoor air is being contaminated from outside dust and
air containing hazardous materials. Wants to know whether an

inspection was made of the ventilation system and whether there
was testing done for asbestos & other contaminants in the dust,

dirt & debris, as well as the air. If so, wants to know whether an
abatement clean up was performed with a HEPA vacuum and other
appropriate equipment.

Also wants to know whether there will be continuous monitoring of
possible dust seepage into the buildings in the future.

Comments:

[DEP] We have no report from the Stock Exchange; DEP will
outreach to the NY Stock Exchange

4/02/02 Exchange refused
to give clean-up data; said
they've complied with all requirements.
Must ~~contact~~ if not clean-up info.
