Problem Comments Caller was interested in obtaining information regarding testing in the building and outdoor air quality. Call was returned and caller was provided the information.

The building owner forwarded the results of the environmental assessments to the DEP. The report indicated asbestos bulk and air sampling (both TEM and PCM) was performed as well environmental assessments for other contaminants. Caller who was concerned about the different news reports was provided information on the sampling, the methods and what the numbers mean. Caller was also referred to the DEP and EPA web sites to examine the data.
