Question:

Wants to know more details about clean up of her building. Pls. provide hotline.

Answer:

Gave her ATSDR/DOH info re her building. They tested 2 apt. + 2 Common areas + found no asbestos. Also spoke of outdoor building cleaning + Air Q monitoring.

Comments:

Woman has breast cancer - doc is not recommending that she return yet. Please call her re other (yong) contaminants found.

Problem Comments The building owner reported the following:

The building owner hired a professional engineer to assess the building, had all public areas professionally cleaned, had all shared building systems professionally cleaned and checked including air conditioning, exhaust system, boiler, trash compactor, laundry, elevators and water tower. An independent environmental firm performed bulk and air quality testing of the building. The owner also included a letter from the NYC DOH indicating the building was one of the 30 buildings sampled by NYCDOH and ATSDR. The letter indicated "no asbestos fibers were detected in the bulk samples" and there was "no exceedances of the re-occupancy standard for asbestos".

Information was forwarded back to the Hotline on 3/29/02 for response to caller.

To: Christopher D'Andrea; Roger Hayes; WTCHotline@otbnyc.com
Subject: Re: DOH Referral Folder

Caroline, with regards to the referrals:

1) 11 Greenwich Street was not part of our Indoor air study. (110 Greenwich Street was....are you sure he's not refering to that address?)

If not, and he wants to know about his building...he can ask his building manager/owner if they had any sampling done and alternatively, he could provide you guys with his name, address, phone number for the future.

Can you or someone up there follow-up on that one.

2) Now, about 88 Greenwich Street, Please have someone up there or you call him back. Let him know that we have not yet recieved that results for the other substances that were tested for....we will add him to our notification list so he can get the results when the rest of the building get's their results.

3) woman concerned about Breast Cancer and contaminnants....could you speak with her?

I think it would be appropriate to tell her that our study looked at contaminants that may be possible as a result of the collapse of the WTC buidlings- such as asbestos, fiberglass, components of cement, etc.

We did not test for chemicals as part of this study....and the contaminants that WERE tested for are not known to be risk factors for breast cancer. We would be happy to speak with her physician if he wants to contact us, the doctor can contact the Hotline. Thanks

Chris and I are working on a public affairs request and we have to finish it by COB today...thanks again, Caroline. bye.

>>> WTC Hotline <WTCHotline@otbnyc.com> 03/29/02 01:08PM >>>
Hi everyone,

I have 3 DOH Referral Questions:

Did we do indoor sampling at 11 Greenwich St.? We have a resident on the phone.

Can someone call [PII] at 88 Greenwich St. -- He wants to know about contaminants found in the indoor air study other than asbestos -- He is moving into apt [PII] at 88 Greenwich and wants to know about all the

results
found in the study. [PII]

Can someone call [PII] at 176 Broadway -- She wants to know about
the
indoor air testing results as well, she has breast cancer and
apparently her
doctor told her not to re-occupy due to contamination? [PII]
or

[PII]

Thanks,

-Caroline
