Subject: Building Facade Cleaning Precautions

Below are suggested precautions for building owners cleaning exterior building facades....

1. If the building is occupied, notify all tenants 24 hours prior to façade cleaning
2. Close all windows and shut off all air conditioning units in apartments directly adjacent to the cleaning to prevent water and debris from entering.
3. Place caution tape directly below the area to be cleaned and restrict access to necessary personnel only.
4. Do not conduct cleaning if wind speeds are greater than 20 miles per hour.

Please provide me your have any comments and/or suggestions on how to disseminate this info.

Gerry, since we do not have Bob Alvaltroni's email we are sending this to you for review.

Thanks, Ken
