PROFESSIONAL TRAINING

1985-1986: Internship-Internal Medicine
Roosevelt Hospital, New York City

1987-6/89: Resident in Occupational/Environmental Medicine
Mt. Sinai Medical Center, New York City

Extensive experience screening and treating cases of occupational illness including many cases of workers exposed to asbestos, heavy metals, solvents, and other hazardous substances. Examined patients, read X-rays for evidence of change secondary to exposure and performed patient education as to hazardous exposure. Developed medical program for groups of workers and their families. Served on advisory committee to major occupational medicine screening program. Carried out research activities. Taught medical students. Also worked for Employee Health service providing urgent and primary care to Mt. Sinai Hospital employees both years.

Marc Wilkenfeld, M.D.
