8/23/02

Dear Ms. PII

The New York City Department of Environmental Protection surveyed over 1000 buildings in the vicinity of the World Trade Center collapse. Our survey efforts did not stop at Church Street and Chambers. Surveys were performed at your building on January 24 and April 24, 2002. The survey did not disclose accumulations of debris from the WTC.

As you are probably aware, the US Environmental Protection Agency has established a hotline and web site for indoor testing and cleaning. You can register for the cleaning and/or testing by electronically submitting your request. Although attempts have been made to compile previously submitted information, you should complete the USEPA registration form to ensure inclusion in this program (if you are interested in participating).

Please refer to the USEPA web site for more information or you may call the hotline number at (877) 796-5471.

Message: re: 9/11/02 building clean-up—How can you stop at Church St on Chambers for the cleanup effort? I have photos showing the cloud coming right at our building (between Church and Broadway) and I still have the

the signs of that ash cloud mixed with the rain of the next day on the outside of my windows.

The roof still accumulates tan rivulets when it rains and I still see sparkles from the dust of the windows of the WTC on the surfaces inside my apartment—I know that all the buildings on my block have people living in them. —what's the criteria for cleanup?
