ⓕ WORLD TRADE CENTER -
GONZALEZ

EL, AC, IM, MG, MH, BAV, KB, AO (by phone)
 Brian Lieberman (Low)
 T/cnf
8/25/06
 WTC -
 Gonzalez

BL - Raced against Kelly McKinney talking to
 Gonzalez
 Might be ok for SEM/DEP to talk with him

MG - Stepped in Aug. 2003
 Everything on exc 2 data points
 No intent to withhold anything - we were running the data
 We were focusing on PCM data (all kinds of freeze)
 EPA was putting out TEM & they thought
 We all all put out TEM data

First couple of months - 9/12 - HogMat
 reading was on jumps

BAV - State had monitors up & we tried to tie
 into them

BL - By 9/16-17 we did try to use DE
 monitors
 But we also started to set up a more
 extensive network. Maybe 9/14-15

BL - Recall a JEP Plan and an EPA Plan
that were complementary around 9/11

BAV - We started conferring w/ all other
Involved agencies on 9/12
Cnf calls at least 2x/day

NYS DOH Coast Guard
NYS DOH DEC
OSHA

MG - Cnf call on an Monday
Everyone was gathering some data
Agreed to share
As time went by - everyone agreed to send
their data to DEC as central repository
+ DEC wd distribute

EL - Wd like BAV to go thru our files and do
a chronology

MG - All our data was given to DEC
3 sets of data were not put on our web
site - kinda the truth

MG - PCM captures all files, incl releases
But not specific to releases

If you get a higher concentration, then
you wd go to JEM to i.e. what
files are there

LOQ = below detection

Overload = filter was overloaded, can't take a read

Concentration
you look for

PCm
• 01

TCm

70 structures/mm² = overload

↳ BAV -
Signs to 30 yd exposure
to overload

BAV -

No outdoor standards

There are indoor standards

We need indoor standards for children to re-enter school

We need most cautious standard available

MG - Levels will be high for first week or two
+ then you get home up + down -

- Wind
- truck traffic
- taking away of WTC debris

AC - 13 missions

Danahy says there was an intent
to withhold

+ first absence of that info

Compromised decision-making ability
to make decisions

MG - PCm done by us

TCm all sent out

EL - Why info from 9/13 - 9/14 held to 9/17

MG - In first days, we didn't focus on
TEM

It was confirmation of what we already
knew

At some point, someone said "we sh put
it on website" We had to go back &
collect and put up

Per date on Oct. 4

There was no QA

Date was just put up

No one checked all date points.

Then on 11/30 - we put up TEM
after someone suggested we sh all
report TEM (EPA was reporting TEM)

We did a TEM on every Per above
- 01.

BL - EPA began 7/12 - 9/13

Then date corresponds with yours

DL - Believes press articles are orchestrated
by TI's law firm (Ward) in federal
class action & also pending immunity

~~action~~. motion.

BL - EPA put them #D on their website
There was a common det. to do this
in early October.

Feels it was unique effort - for an
emerging to
continued to Nov. 22
develop
conditions
this way.

BL to e-mail BAI what EPA's
site showed for first few days

[If they showed high #s - our #D wd
essentially be moot]

AC - Was told to Myers Office
(Jim Anderson) to formulate a response

BL - Short rebuttal letter
stating we kept vigilant

BAI - response sh come from Myers Office
with area we clean

BAI - EPA was lead -
clean up program led by EPA
