RE: Daily Report for 10/02/01
DATE: Oct.2, 2001 via FAX

Summary of outstanding activities for 10/02/01.

DOH has asked for all the locations where the contractor, hired by DEP, has cleaned.

Interceptor Sewer Repair

Request to delay repair of interceptor sewer. Mike Madden, Grace Industries, 917-560-5128, will meet Ron Fessel tomorrow morning to discuss the possibility of delaying the repair to the interceptor sewer, damaged by a steel box-beam. This request is made because the work required to complete the job would require enlarging the hole, encroaching on the temp. road and thus stopping the work near-by on the pile.

Gateway residents calling

I have been receiving many calls from residents of Gateway facility saying that a memo, on Gateway letterhead, advises them that DEP and specifically, myself, should be called for information regarding re-occupying their building. DEP's phone number at the EOC is given. Furthermore, I'm told that the memo states that the caller should not believe me when I say they should contact the building management for information when the building can be re-occupied. It says that DEP provides the final word.

I had Frank Vazquez check the Gateway buildings for this memo, but haven't found one yet. I'm trying to get one of the callers to fax me the memo, but haven't succeeded yet. The callers say that they saw the notice on the board in their lobby that contains all the emergency contacts.

Health and Safety meeting

Port Authority is in the process of identifying the location of the bulk storage tanks on the pile.

Air sampling by EPA in the American Express building indicated that the asbestos levels on the first, second and twenty-fifth floors had asbestos levels below the maximum permissible.
