Constance:

I cannot open these documents. They are .vsd files. And, I don't know how to open these.

Alex,

See the attached regarding what the official document source for each system type over the last few years was.

Unfortunately, we do not have a data for the I and I maps for the sewers. We contacted the preparers of these and they were not able to provide it. I can continue with them on it, but so far I was unsuccessful.
