Subject: 130 Liberty Street - Manhattan

On Tuesday 24th December, 2002 I conducted an inspection along with Supervisor Rasti of PAL (Asbestos Contractor) of 130 Liberty St. At this time WTC debris was still being cleaned up on various floors of the north half of the building. The 26, 24, 25, 23, 22, 21, 20 floors have been finished. Workers were about finished for the day as no work was scheduled for the Christmas Holiday.

In reference to the Mold problem at the building, Rasti informed me that another crew from PAL had completely removed all the mold from the entire building. He was not sure of what method was used. However, he said he was sure that all mold from the basement to the top floor was gone.

Subject: FOIL Request for WTC-related Data from NY Environmental & Justice Project

This is a heads-up on a WTC-related issue:

We received a FOIL request in September 2002 from the NY Environmental Law & Justice Project (a Mr. Joel Kupferman), requesting copies of all environmental assessments, bulk sample results, air monitoring results and clean-up summaries submitted to us by private building owners downtown who had undertaken clean-up on their own, in response to letters we sent to owners requesting such data.

Because the Law Department is coordinating the responses to all WTC-related FOILs, we reviewed the request with Law, and staff from Law reviewed the types of responses we received back from owners. Their conclusion was that, except for 3 property owners who requested that their data be kept confidential under the FOIL exemption for trade secret/competitive information, they had no objection to making the balance available under FOIL.

Because this particular requester is impatient, he has now filed an appeal with our FOIL Appeals Officer (Robin) essentially claiming constructive denial of his request (which is not true; it took some time to confer with Law and review the material). We will be moving ahead to make the data available, except for the data from the 3 owners who invoked the exemption, and we will be making arrangements with Mr. Kupferman for him to inspect the material at our offices (the typical way we handle large amounts of material).

Please note that in the same FOIL request, Mr. Kupferman also asked for a list of owners who received our letters requesting this data (we can easily handle this by providing him with copies of all the letters we sent out), a list of those owners who answered (he can generate this himself by looking at the responses received), and a list of "ensuing inspections and enforcement actions."

This last item should be noted. Given the FOIL request, it is likely that follow-up inquiries will be received from the press/elected officials/members of the public concerning the nature/level of DEP inspections and enforcement activity vis a vis owners who performed their own clean-up. I suggest that Bob and his staff prepare some materials explaining what we did, how we did it, and why we believe it was the sensible approach to this aspect of the downtown clean-up effort. This would be helpful in responding to inquiries.

Please let me know if there is anything you would like to discuss.

Subject: air quality update

Just want to update you on the air quality project, in lieu of last week's meeting. Edelman has met with some EPA researchers and is continuing some web research, hoping to put a draft of something together in the next couple weeks. (They may be contacting you for additional information and suggestions.)

As their work progresses, we will meet again to review. Please let me know if you have any questions.

best,
Laurie Tamis

Subject: Air quality outreach

Hello, hope you are doing well. Quick question - has DEP done any LM outreach through mail to residents? I'm trying to find a way to avoid using EPA's rental list strategy (too expensive). If you have any ideas, I'd love to hear them...thanks.

Subject: DO IT DOWNTOWN! PROGRAM

Dear Friend of Wall Street Rising,

Re: DO IT DOWNTOWN! PROGRAM

Many of you have inquired about a possible extension of the Do It Downtown! Discount Card program that offered discounts at over 250 Lower Manhattan merchants as the program officially expired on December 31, 2002.

We are presently collecting feedback from the merchants about extending their individual discounts and their willingness to continue to accept the original Discount Card (which has expired). Once we have compiled a full list of those who will continue to honor the card we will post it on our website at www.wallstreetrising.org. Please check back at the site periodically for updates. We also suggest that you contact the individual merchants in the meantime to ask if they will continue to offer their discounts in 2003.

If you threw your 2002 card and brochure away, we have more available.

Thank you for your ongoing support of Lower Manhattan.

If you like to remove from the mailings please email to info@wallstreetrising.org with subject message REMOVE
