Subject: RE: FEMA Letter for carpet removal at Ground Zero schools

I can easily fax you an additional copy of the protocol which is only on page. There is endless sampling data in various different forms. We have sent both the sampling results and the testing protocol to DEP in the past, and your folks reviewed them to prepare the October 2002 letter which referenced both the sampling and the protocol. I don't see why it would be necessary for you to review all of the data yet again. Of course, we will (or already have) provided FEMA with all testing results, protocols, costs, etc. (Note, I am not the point person with FEMA). As for cost, we are still working on the numbers. We originally estimated approximately \$1million. However, some schools already had some carpets removed. Please call me so we can finalize next steps - 212-374-0214 or cell 917-658-3239. Thanks so much for all your help.

Matt, Please send me the associated protocols referenced in the DOH draft, as well as the sampling results for all schools involved. This will provide justification for the FEMA funding request.

Received a call from NY1 regarding 114 Liberty. They are saying they can't get back in until at least Thanksgiving? Doesn't want this to blow up in the press. On his way to Washington 917-842-7947

Subject: Draft letter

Kathy

We have started to draft the letter we spoke about at last night's meeting and will incorporate HVACs. In this manner, we will reach the total population of building owners who need to make a decision. With this in mind, could you also produce a list of building owners who would fall into this category (I believe that number was 72). The list we envision would have three elements:

- 1) Buildings with common spaces only
- 2) Buildings with HVACs only
- 3) Buildings with common spaces and HVACs

FYI, we have had contact with some air monitors regarding payment issues and have told them all invoices that we received have been processed, so if you have any invoices ready to be processed, please send them to us.

Also, we mentioned to these contractors that EPA would be calling them to schedule a meeting for Monday, February 3, to discuss a variety of issues. Please advise me of the time as soon as you know so that I can let DEP staff know.

Thanks

Mike
