Subject: Follow Up Meeting

Thank you all again for meeting last week to discuss outreach strategies. As per our conversation, we are moving ahead and setting up the first meeting of a working group. To expedite the process, we'd like to aim for this Wednesday, December 4 at 11 am at City Hall.

Please let me know if you will be attending, or designate another individual. I look forward to seeing you.

Thanks,
Laurie Tamis

We are working on EPA to get an appropriate response.

Brad and I are double teaming these folks. We will prevail. It is the most thankless endeavor we will ever be asked to address.

Subject: HVAC Meeting

It has taken me a while to digest the comments made at our meeting today. In essence, we are being told to advise the residents that a health risk has existed for 15 months through an unrealistic HVAC assessment and clean-up process. How can we even entertain being so irresponsible when existing data suggests just the opposite. The last thing we should want to do is through the responsibility back to the owners and residents. We need to make immediate decisions to move the program to conclusion. Many of the comments we heard today were easy cover your behind easy way out suggestions. We need to be the decision makers able to fulfil our roles as responsible public servants. I know you are at West Point tomorrow, but the time has come for us to collectively look this thing in the eye and move. Let's discuss ASAP.

Subject: Tomorrow's meeting

Kathy,

As you know, we will be meeting tomorrow with City officials, FEMA and Edelman. It is very important that the facts you cited so elegantly last week to us be shared with those in attendance. Would you please ensure that your representatives have these facts available for presentation at tomorrow's meeting. It is essential that we get factual positive information out to the public through our consultants.

Thanks,

Bob
