agenda for EPA meeting July 26...

NYC 9/11 Public Portal Document

NYC Department of Environmental Protection
EPA – Indoor Air Residential Assistance Program

- 110 Liberty Street
  - Based on the test results all the proposed clean up procedures needs to be re-evaluated.

- 125 Cedar Street
  - The building management had collected and analyzed about 93 bulk samples and none of the sample is greater than 1%. The building sustained structural damage and was also loaded with WTC debris.

- Clean up Procedures – Issues
  - Re-location – Red Cross
  - Use of Air Filtration Device (micro-trap) for Scope A work.
  - Use of leaf blowers before air monitoring
  - Cleaning of all the common spaces based on one or more calls from a building

Subject: DEP Exterior Cleanup

Ø DEP Exterior Clean up

DEP began its exterior and façade clean up of buildings on Friday, 6/7. DEP's contractors have completed 70 buildings, to date. Currently DEP has 63 buildings that need to be cleaned. Of the 63, 8 are underway and 16 are ready to be cleaned (that is DEP and it's contractor have inspected the site and DEP has secured the necessary permits and arrangements have been made with the landlord).
