Subject: data table

I brought back the message to DOH re need for prior interagency review before any information is sent to AP. I do need to correct a statement I made re inclusion of the fib. glass information in the draft. The information being considered for release to AP is for asbestos only; there is no info re fib. glass. Sorry for my mistake.

Subject: WTC Indoor Air TASK FORCE

The WTC Indoor Air TASK FORCE meeting is scheduled for Monday, April 8, 2002.

The meeting will be held in the EPA offices in New York City, at 290 Broadway, from 10:00 am to 12:00 noon, in Kathy Callahan's Conference Room, #25A.

The call-in number for this TASK FORCE meeting is 202-260-8330, access code 5010#.

An agenda will follow. Please let me know if you have any questions.

Subject: EPA Indoor Working Group Meeting

From Michael Gilsenan

Diana Chapin asked me to call/fax you regarding today's EPA Indoor Working Group meeting. At the meeting, DEP stated its position regarding the asbestos levels that the COC committee has recommended. Our stated position was the same that was articulated at last Tuesday's Sr. Staff meeting with Joel. Once again, DEP is concerned that the levels under consideration will set new standards that are unreasonable for schools, businesses and other dwellings throughout the City. We indicated to Mark Maddaloni of EPA our concerns regarding scientific backup for these levels as well as assumptions made regarding risk factors.

Also, you should note that some staff from NYCDOH and NYCCOSH seemed to agree with our position.

Jane - please give this to Mikel! Thanks.

We need to raise this at our task force meeting with Kenny and Callahan on Monday! There is no way EPA should be issuing any benchmarks, guidance ... that cannot be attained! This is counter to any common sense.
