Penny,

R02100400 prelim
report.xls

ATC is in receipt of some of the "ost" test wipe samples for dioxin analysis. Once the remaining become available, I shall forward them to your attention. In addition, PSC has long since disposed of the PAH wipe extractions.

Ben,
Attached are preliminary results for the above work order. These are the first 20 of the "post" tests. Note that the last three samples are "pending". They are awaiting confirmations.

Also, regarding your PAH wipe samples, these were disposed of long ago (extracts are only good for a few days). Tell me what you're looking for and maybe we can get it from the data already generated.

Thanks! Fred
