Subject: Interior Dust Cleaning Invoices

I have just been notified that the contracts for Athenica, and Kiss Construction have been registered by the Comptrollers Office and may proceed for payments. Please forward all approved invoices to date, as soon as possible.

Most of the remaining contracts are expected to be registered within the next couple of days, so approved invoices may also be submitted.

Cole Consulting has not yet returned the signed contract books, which has delayed the registration process. They have been notified, and informed that payments can not yet be processed.

Subject: EEDAU's Help Desk at 110 Maiden Lane with other Gov't. Agencies

Mike --

I mentioned to Charlie yesterday that we have been having very few "walk-ins" with environmental questions for a while now. Quite different from September and most of October, when the location was astir with people concerned about their drinking water, air quality, asbestos, dust, entry to their buildings, clean-up of their buildings, etc. Charlie said we should shut down. I told him we would complete this week through Saturday, 11/17 (Fred Edmond covering), and that I would leave a sheet with appropriate DEP telephone numbers and handouts with the remaining agencies. The Public Service Commission, Verizon, and Con Edison have already left, or moved to other locations. FEMA, SBA, EDC, DBS, and the voluntary lawyers and CPAs remain at this time.

I believe EEDAU provided an important public service to businesses and residents in the aftermath of the disaster. Now the DEP Helpline is better known and the services we provide as well.
