Subject: 114 Liberty Letter to FEMA

FEMA72903.doc

Here's the latest version with a few minor revisions, the most significant of which are the addition of a "minimum concentration" column on the table and a reference to the EPA website regarding our Confirmation Cleaning Study. Please let me know if you're ok with this. Thanks.

FEMA72903_1.doc

I'm happy to be included as a contact in the letter you sent but wish you would have told me first. I would have insisted that you make the change regarding indoor and outdoor comparisons for wipe samples. They are simply not done using this technique. These references should have been removed.

Mike - I got the signed copy faxed to me. I left a message that I will pick up the original if they want. Walter

Walter, FYI, DEP dropped off the signed letter today at EPA. They will be forwarding it to you as soon as they sign it. Mike

I just forwarded my draft to jessica for review. As far as the results are concerned, there are only several species I can't quite make out on my copy. If someone can just spell them out for me, and confirm the others that would be fine.

 Chris,

I am just following up my telephone conversation with you this morning. As discussed, there seemed to be some confusion here at DEP in getting your response and okay to use you as a contact in the letter. I apologize for that and appreciate your efforts in this matter. I was able to stop the letter and await your changes to it.

Thanks again,

Mike
