Subject: data table

I brought back the message to DOH re need for prior interagency review before any information is sent to AP. I do need to correct a statement I made re inclusion of the fib. glass information in the draft. The information being considered for release to AP is for asbestos only; there is no info re fib. glass. Sorry for my mistake.

Subject: Re: Mold at 200 Rector Place

Lisa,

If HPD has issued a violation (they do handle mold complaints), there is not much more we could do, especially if the source of the moisture problem has been addressed. Still, [PII] could register her complaint with our Environmental Investigations at 212-442-3372/6.

No agency will sample the mold and if the mold is a result of the refrigerators being closed (mold inside the refrigerator?) I'm surprised that HPD would even issue a violation.

If [PII] has more questions about mold you could refer her to me at 212-788-4290 but I would prefer not to talk with her because of her poor phone manners.

Call me if this issue lingers.

>>> WTC Hotline <WTCHotline@otbnyc.com> 04/03/02 04:24PM >>>
 Hi Chris,

I just received a call from [PII] who resides at [PII] [PII] (and who we've heard from several times here at the hotline regarding indoor air quality, etc.) Her most recent complaint is regarding an apparently serious mold issue all over the inside of her apartment/building. It seems that the mold problem began because the landlord of her building didn't handle the refrigerators and freezers that were left when residents left the building following 9/11 and now he refuses to do anything about the situation. [PII] has spoken with HPD and they have classified the mold a Code "C" violation--I'm not sure what that specifies--but they don't have the jurisdiction to handle it.

Roger suggested I email you to see what the next step should be. Is there someone [PII] could contact who could come to her building and culture the mold or anything?

Please let me know.
 Thanks,
 Liza Henry, OEM

Subject: Summary of calls received at the hotline on 4/3/02

Good morning everyone,

Below is a summary of the calls that were received by hotline operators Weds, April 3:

We received a total of 18 calls during operating hours:
 8 were about the environmental conditions in lower Manhattan
 2 were potential requests for indoor air testing
 4 were for the old WTC hotline
 4 were "other" questions

We received 1 voicemail which was a hang-up.

-Kara

As of 11:30 am today (Thurs, April 4) we received 1 call.

Subject: RE: ASbestos monitoring contract

Importance: High

I will be meeting with Mike Nolan, Warren & Panser this afternoon at 1:30pm in my office. He will be the project manager for the new Air Monitoring Contract. After the meeting we will be going to see the 20 sites where his crew will replace RiverPoint tomorrow.

Subject: ASbestos monitoring contract

Leonard:

Mike called me and let me know that the Bureau has a new asbestos monitoring contract for lower Manhattan. He informed me that he would like you to assist the Asbestos Unit as they manage the contract. Mike advised me that your assistance will be required to review the air monitoring flow rates and provide other assistance pertaining to sampling procedures. This is to assure proper sampling methods are used by the contractor.
