Subject: DEP scope

Good morning Mike,

I'm checking to see if the written scope of work for 125 Cedar St. has been completed yet. My understanding when you and I spoke last week was that today (Wed., July 24th) would be the deadline.

We had a tenants meeting last night and everyone is concerned that the scope will not be thorough enough because a final DEP walk through was not conducted with ALL of the tenants present. Do you share my concern?

As you know all of the tenants are eager to return home A.S.A.P. but we also want the clean up to be as complete as possible the first time it is done.

Please get back to me with your thoughts.

Thanks [PII]

Gilsenan, Michael

Frank - can you give Larry a general description of what is being discussed onb the scope?
 Thanks.

Bob/Mike - any further word on whether FEMA will pay for the extra insurance, if the City elects to buy it. Note that Larry Martin (Law) is talking to someone at FEMA about this.

Last time we spoke, you mentioned, I think, that EPA was still raising some issues as to the scope of the work on the interior cleaning contracts. What were the issues and have they been resolved? Are there any other outstanding issues (besides insurance)?

In the meantime, Larry Martin will speak with FEMA's consultant to find out whether FEMA will pay for the cost of the insurance.
