Subject: DDC request results of any WTC mercury monitoring

Bob Adams, DDC Health and Safety, contacted me to ask if we conducted any monitoring for mercury in conjunction with DEP's WTC monitoring. He's looking for any results: air, bulk sample, or water (drinking or ground) etc.

Please let me know if you are aware or not aware of any mercury monitoring.

Thanks, Paul

Subject: Reducing Asbestos Sampling sites

On next Monday's conference call, there will be a discussion of revamping the current sampling. Each agency is supposed to indicate the sites that it would recommend continuing or terminating sampling.

Based on the sample results at the twenty sites that we have been monitoring, it seems that we could recommend discontinuing all of them if EPA or DDC or DEC agree to continue to monitor at representative locations which might be defined as areas where debris is being removed, processed or carried along.

I will forward a "strawman" that Harold put together. We would not recommend stopping any of the school sites for now.
