Subject: Fwd: List of WTC research

I'm attaching the research inventory and a 1-page form to use for submitting additional projects that should be added to the list. I'm also pasting-in below a cover note I used when I sent out the inventory. Kathy Tannert's email address is included in order for readers to know that revisions should be sent to her.

COVER NOTE:
Attached please find the latest draft of WTC research of which NYCDOH is aware. This list was prepared by Kathryn Tannert Niang, under the direction of Rose Gasner (Office of Planning and Program Implementation) We are awaiting additional details on a number of projects; however, this list provides an overview of completed, current and proposed research projects from the NY metropolitan area and includes several studies from California, Boston/New England, Washington, DC and one international collaboration.

The inventory is formatted in 2 sections. The first section includes info source, research focus, design of study, title, and sponsoring institution, and it runs to page 15. The second section with correspondig code numbers begins on the 16th page. The second section includes principal investigator, population studied, sample size, funding source, IRB approval, methods and status. The lists can be used side by side.

If you have any additions, questions or comments, please contact Kathy at (ktannert@health.nyc.gov). A data collection form is also attached which can be used to submit additions to the list.
