Subject: RE: WTC Replacement Vehicle

Nick , I spoke with Moustafa Fawzy Director of Hazmat who has said that the replacement vehicle does not meet the requirements for a Hazmat emergency response vehicle. The vehicle needs four wheel drive that can respond to emergencies in all weather conditions (snow, etc.) and a large cargo area similar to a suburban (SUV) vehicle.

Subject: WTC Replacement Vehicle

Bob, Fleet purchased a 2001 GMC Safari minivan to replace vehicle # 841-003 that was damaged at the World Trade Center Disaster. Please let me know what if at all emergency light & siren package is need via e-mail and Fleet will have to order it. In the meantime can you have this vehicle picked up from CRS. If you request an emergency light & siren package we'll contact you when it comes in for installation.
