Subject: FEMA

Our FEMA examiner has requested that the bureaus submit a detailed explanation of the work performed during the World Trade Center crises.

Please submit to me no later than Thursday 11/8/01.

Thank you for your cooperation.

This is the matter I mentioned to you earlier today. I need to ask you to call Ms. Schultz right away. It looks like this didn't get to you last week and Jaffe is calling me again on Schultz's behalf. Can you give Ms. Schultz a call tomorrow (Thursday)? Thanks.

I just got a call from David Jaffe, who is the General Counsel in the Mayor's Office of Criminal Justice.

David has a friend in the Governor's Office, Jennifer Schultz, who has a female relative going back to work in 1 Liberty Plaza. This person is pregnant and is worried about air quality. She'd like to talk to someone who can allay her concerns about returning to work. Can one of you call Jennifer, get the name and number of her relative, and answer that person's questions (or refer her to someone who can)? I'd appreciate it very much.

Jennifer Schultz's # is 212-681-4565.

Thanks.

Subject: WTC TRAGEDY - JOB ISSUES

We are pleased to announce that DEP will be offering training for Supervisors and Managers to increase awareness of job performance issues that may have arisen as a result of the World Trade Center tragedy. The focus of the training will be on how to identify changes in job performance and job-related behaviors, and how to help subordinates get back on track.

The first session will be offered at Lefrak on Wednesday, November 14, 2001 from 10:00a.m. to 11:30a.m. in the Training Room on the 6th floor, high-rise. Please call the Training Office at (718) 595-4175/4176 to register your attendance.

If you wish to arrange for future sessions, you may call James Cacopardo, C.S.W. at (718) 595-4320 to arrange a time and place.

Subject: EPA requests DEP to assume vac operations

EPA's representative at the Pier 92 EOC, Dale Carpenter - 646-756-3057, has requested DEP to assume the HEPA vac operations that are currently being performed by EPA contractors.

EPA gives the following reasons for their request:

- EPA has completed the clean-up of the streets and sidewalks of lower MN.
- EPA's contractor is too costly at \$20,000 per day.
- The volume of work has decreased substantially.

Currently operating at Pier 6 cleaning structural steel and the odd clean-up as identified.

EPA also said that their contractor is experiencing difficulties in dumping their loads at Fresh Kills Landfill because DEC states that not all material is from the WTC. DEC is also requesting lot analysis of the material on each truck.

EPA said they would work with DEP in obtaining the necessary resources (vac truck, training, etc.) for this task from FEMA.

I've spoken to Mike G. (Bob A. is out of the office) and he thinks it needs to be looked at closely. Please let me know how you would like me to proceed.

Paul.

I need opinions from everyone. Maybe the contractors at the WTC should be charged with the responsibility of continuing the work under the site coordinator in the Health and Safety Plan with us doing occasional site inspections for compliance?

Subject: emergency contracts

1. I clearly recall advising everyone at our meeting that when BEC did the bids for the Schools, it had to be in writing and no fax. THIS IS NOT A SMALL PURCHASE. The other two Emergency contracts were done with hard-copy bids (as far as I know), not Faxes. What made BEC think that they could solicit Fax bids for a contract that is not a small purchase?
2. What in the world was BEC thinking when it accepted a bid because it was the first received? There is no provision anywhere for such a selection criteria.
3. I am at the verge of removing all delegation which allows BEC to perform its own bid solicitation.
4. I really need to be calmed down.

Subject: citizen concern - asbestos

Sharon Sachs (212-645-2324 [office] - 212-732-9476 [home]) has seen an article in the Wall St. Journal about asbestos in buildings that quoted Chas. Sturcken. She wants to discuss same with someone at DEP. CGS advises that such calls should be handled by your staff, so would you have someone call her. She apparently has been transferred to and from a good many phones this morning, so a prompt response is recommended

Subject: FDNY/DDC Meeting - December 3, 2001

Paul Bennett asked me to send this E-mail.

Today I attended the DDC / FDNY Operational meeting at the WTC. The following issues arose:

NYS DEC stated they are issuing violations to idling trucks at the site and will continue to issue violations.

DDC again reminded their contractors to improve dust suppression. Paul wanted me to mention there will be a meeting regarding dust suppression today at 3 p.m. at Pier 92, which he will attend.

DDC announced that the US EPA will hold a meeting to brief the contractors on environmental issues tomorrow @10 a.m. at 3 World Financial Center, 26th Floor. City agencies are welcome to attend. Please let Paul Bennett know if you plan to have someone attend the meeting.

Subject: Summary of 12/3 Dust Suppression mtg

Mtg: Dust Suppression at WTC site, 12/3/01, 3PM
Attending: DDC, DOH, OEM, DEP
Summary: DOH Assnt Commissioner Kelly McKenny stated that he was not comfortable with opening up additional areas around ground zero unless dust suppression could be improved. DDC indicated that they thought dust suppression was effective. DOH and DEP agreed that the current dust suppression efforts were considerably better now than they were during the early stages of the rescue/recovery efforts. However, DOH reiterated that in order to shrink the red zone further would require even better dust suppression. DOH / DDC also stated that they have not seen any recent air monitoring results for several parameters and would like to get them from DEC and EPA. The meeting concluded with DDC stating that they will review enhanced dust suppression recommendations made by Bectel (the Health and Safety organization that developed the original Site Health and Safety Plan) and get back to DOH on their findings. No time was set for a follow-up meeting.

Paul.
